

ERNESTO ALMARIO

Sr. Software Engineer / Web3 Engineer

Versatile Technical Lead and Senior Full-Stack Engineer with over 4 years of experience building high-performance applications, modular monolith systems, and Web3 architectures. Proven track record of guiding cross-functional teams across the full SDLC, bridging UX/UI design with robust backend engineering, conducting strategic market research, and representing executive leadership at key industry events. Experienced in end-to-end project planning, budget allocation, technical reporting, and aligning engineering execution with core business objectives. Core stack includes Angular, Next.js, NestJS, Laravel, Rust (ink!), and multi-chain blockchain integration.

Experience

Sr. Software Engineer (Freelance)

FizzBuzz PH

Mar 2025 - Present

www.fizzbuzz.ph

- **IT Infrastructure & Cloud Operations:** Monitor and maintain cloud infrastructure (AWS, Bluehost, Firebase) and hosting environments to ensure high availability, server health, and optimal database operations
- **Domain & DNS Administration:** Oversee enterprise domain portfolios and DNS configurations across registrars (GoDaddy, Network Solutions), ensuring zero-downtime routing, timely renewals, and secure credential management.
- **Mobile Store Console Oversight:** Audit Apple App Store Connect and Google Play Console accounts to track application stability, resolve compliance alerts, and monitor crash reports.
- **E-Commerce & Platform Maintenance:** Manage WordPress infrastructure, executing core security patches, product catalog updates, and third-party API tool integrations.
- **Digital Tools & Utilities:** Internal QR Code Systems, Product Asset Tracking, Barcode/QR Generation Tools.
- **Mobile App QA & Unity Testing:** Conducted quality assurance and cross-platform functional testing for Unity-based mobile applications on iOS and Android devices, identifying performance bottlenecks and logging build issues prior to store releases.

Platform Engineer Manager (Web3)

RAK SON OPC

Aug 2024 - Apr 2026

rocksonotech.com

- **Technical & Design Leadership:** Directed engineering operations and technical architecture for a hybrid Web3 gaming platform, leading cross-functional teams of developers, UI/UX engineer and 3D Artists while directly designing high-fidelity Figma user interfaces and interactive prototypes.
- **Web2-to-Web3 Strategic Market Research:** Conducted targeted market research to model friction-free user onboarding, bridging traditional Web2 gamer experience with Web3 asset ownership and zero-gas token economics.
- **Industry Representation & Business Networking:** Represented the company at major tech and industrial conferences, building strategic partnerships, connecting with web3 ecosystem leads, and exploring collaborative growth opportunities.
- **Project Planning & Operations Management:** Managed end-to-end project planning, resource mapping, budget allocation, and technical milestone reporting for executive stakeholders to ensure projects were delivered on schedule and within budget.
- **Modular Monolith System Architecture:** Standardized enterprise system design across projects by establishing modular monolith boundary patterns, explicit domain contracts, clear ERDs, and core technical documentation.
- **Full-Stack & Web3 Engineering:** Engineered modular frontends using Angular and Next.js alongside NestJS backends, and deployed Rust-based smart contracts using ink! on Substrate.

Sr. Software Engineer

Blockspace Cooperation
blockspacecorp.com

Jul 2023 - Jul 2024

- **Web3 & Full-Stack Engineering:** Pioneered professional career entry into Web3 development by architecting high-throughput dApps and web applications using Angular, Fastify (Node.js), MySQL, Prisma ORM, and Polkadot APIs.
- **Client Engagement & Web3 Walkthroughs:** Reported directly to primary client (RAK SON OPC), delivering regular technical status updates, Web3 architecture walkthroughs, and dApp milestone demonstrations.
- **System Design & On-Chain ERDs:** Designed end-to-end Entity-Relationship Diagrams (ERDs) and relational database schemas optimized for Web3 transaction logging and state tracking.
- **Agile Leadership & Web3 Mentorship:** Mentored junior developers and interns on Web3 integration patterns and clean code practices while facilitating daily standups and sprint cycles following Agile/Scrum methodology.
- **Quality Assurance & Data Integrity:** Ensured high dApp reliability and state consistency by enforcing Test-Driven Development (TDD) practices, comprehensive unit testing, and rigorous debugging workflows.
- **UX/UI & Web3 Onboarding Design:** Crafted user flows, Web3 onboarding wireframes, and UI prototypes in Figma to align client product visions before technical execution.

Jr. Software Engineer

Human Incubator
<https://humedit.ph>

Mar 2022 - Jul 2023

- **Full-Stack Web Development:** Developed and maintained responsive web applications using PHP (Laravel), Angular, Node.js, and Vue.js.
- **IoT Hardware Integration:** Engineered a dedicated C# Windows Forms desktop application to interface directly with IoT weight scale hardware, automating physical metric logging.
- **UI/UX Prototyping:** Translated product requirements into interactive wireframes and high-fidelity user interface prototypes utilizing Figma prior to technical execution.
- **Quality Assurance & Testing:** Authored comprehensive automated unit tests in an Agile environment to validate core business logic, reducing production defects.

Projects

XGame: Web3 Gaming Platform

xgame.live | Rak Son OPC

Jul 2023 - Apr 2026

- **Role & Tech Stack:** Platform Manager (Web3) | Next.js, Rust (ink!), Substrate, PostgreSQL Supabase, MongoDB Mongoose, Figma
- **Project Management & Cross-Functional Leadership:** Managed and led the XGame product lifecycle across both Engineering and Marketing teams, aligning technical delivery with market positioning, player acquisition strategies, and tokenomics.
- **UX/UI Design:** Designed end-to-end user journeys, wireframes, and high-fidelity interface layouts using Figma.
- **Full-Stack & Web3 Engineering:** Architected and developed the XGame platform using Next.js for web interfaces, NestJS/Node backends, and Rust-based ink! smart contracts on Substrate with dual PostgreSQL/MongoDB data layers.
- **Product Delivery:** Engineered and launched core modules including the XGame Homepage, Zero-Gas NFT Marketplace, Player Dashboard, and Game Play Pages, reducing Web3 onboarding friction by eliminating user gas fees.

AI & Productivity Tools

- Gemini AI: Technical documentation refinement, professional communication, and content rephrasing

MultipayX: Crypto Payment Gateway & Exchange

[multipayx.net](#) | Rak Son OPC

Sep 2025 - Nov 2025

- **Role & Tech Stack:** Senior Software Engineer | NestJS, Next.js, MySQL, PostgreSQL, Rust (ink!), Substrate, Polkadot.JS API
- **Crypto Payment & Exchange Engine:** Engineered an end-to-end crypto merchant payment system featuring direct Buy & Sell crypto options, multi-chain settlement, and near-instant transaction finality.
- **Smart Contract Integration:** Developed and deployed Substrate-based ink! smart contracts to manage transaction logic and on-chain verification via Polkadot APIs.
- **Management & Reconciliation Dashboards:** Built comprehensive administrative web applications for real-time transaction auditing, revenue/asset distribution, and merchant onboarding, accelerating manual reconciliation speed.

NIPT Diagnostics

May 2023 - Jul 2023

[www.hiro-clinic.or.jp](#) | Human Incubator

- **Role & Tech Stack:** Jr. Software Engineer | Angular, Vue.js, Laravel, MySQL
- Maintained a high-availability healthcare portal for genetic sequence parsing using Laravel background queuing systems.
- Built automated PDF report generation engines and real-time reactive clinical dashboards for complex trisomy screenings.

Smart WMS & Logistics Suite

Mar 2022 - Apr 2023

Human Incubator Inc.

- **Role & Tech Stack:** Junior Software Engineer | Angular, Laravel (PHP), MySQL, IoT Integration (Winforms C#)
- **End-to-End Inventory & Inbound Logistics:** Engineered full supply chain workflows ranging from initial truck arrival requests (estimated arrival time tracking) and dock arrival logging to warehouse receiving, bin-to-bin transfers, dynamic put-away, and partial bin allocation.
- **Warehouse Receiving & Ingestion:** Built a robust warehouse receiving engine utilizing integrated barcode scanners to automatically identify, validate, and register incoming freight against digital manifests instantly upon offloading.
- **IoT Weight Scale Integration:** Integrated physical IoT weighing scale hardware into the system, automating physical weight logging and increasing receiving accuracy while eliminating manual entry errors.
- **Backend Quality Assurance:** Wrote comprehensive automated unit tests in Laravel to validate inventory movement algorithms, data integrity, and core business rules.
